

# SDVoE Resource Guide

The guide below lists many resources available to you and your company to jump start your educational processes around SDVoE technology. You will find Academy courses, networking design resources, and implementation case studies. Feel free to share this guide with anyone in your company who would benefit from these resources.

NETWORKING RESOURCES	DESCRIPTION
<a href="#">SDVoE Network Design Help</a>	Visit this page, fill out the form to request design assistance from SDVoE members with expertise in network switches to help with network designs.
<a href="#">SDVoE Networking Requirements</a>	Read this blog to understand the two SDVoE network switch capability requirements and the three SDVoE network switch configuration requirements.
<a href="#">AVoIP: Impossible on Your Existing Network</a>	Read this blog by Laurent Masia, Sr. Product Line Manager for Managed Switches and Modules at NETGEAR, as he explains why adding AV signals onto an existing 1Gb network does not work on an already oversubscribed network.
<a href="#">Network Basics on SDVoE Academy</a>	Log in SDVoE Academy to find 26 courses on Network Basics.

SDVOE CERTIFICATIONS	DESCRIPTION
<a href="#">Design Partner</a>	Click the link to learn more about the Design Partner Certification program and start your journey today.
<a href="#">Developer: Level One and Level Two</a>	Click the link to learn more about the Developer Certification program. State Level One today.
